

TWO TO 48 HOURS AHEAD

CYBERSECURITY SOLUTIONS

MailGuard Advanced Email Filtering

ISO/IEC 27001:2022 Certified

MailGuard

Advanced Email Filtering

Businesses are being targeted by cybercriminals with advanced email threats that outsmart even the most robust security measures like Microsoft 365, including Defender.

MailGuard's proprietary IP, threat-detection engines stop fast-breaking, zero-day email threats like phishing, ransomware and sophisticated business email compromise (BEC) attacks.

Seamlessly stackable with Microsoft 365, Google Workspace and other email platforms, it provides an added layer of specialist email security to reduce the impact of cybercrime on business.

Proven to be up to 48 hours faster at stopping threats, it provides zero-hour defense, providing immediate protection to inboxes globally.

Advanced Email Threat Protection

Neutralize Threats Before They Reach Inboxes

Depend on the expertise of a provider that is constantly monitoring and combating the new and emerging threats that are targeting your teams inboxes. MailGuard's Advanced Email Threat Protection eliminates threats before they reach your team and your network, safeguarding your business against the devastating consequences of a cyber attack, from financial losses, to business disruptions and legal and reputational damages.

Up to 48 Hours Faster Stopping Threats

Block Zero-Day Phishing, Ransomware & BEC Attacks

In email security, speed matters. Other vendors will claim to stop malicious threats, but the more important question is when? MailGuard's unique, proprietary cloud-based infrastructure provides greater agility and speed to deploy protection to customers fast. Proven to be up to 48 hours faster than rivals, when a threat is identified and blocked that protection is deployed immediately to customers around the world.

24/7 Support from Email Security Experts

Real People There When You Need Them

A pioneer in cloud email security since 2001, the MailGuard team has acquired many years of expertise supporting businesses just like yours. And when it comes to protecting your people and your business, you need the support of a team of experienced professionals who are experts in their field, there for you online and on the phone 24/7, to assist with optimising your environment and remediating threats.

Real-Time Management & Custom Policies

Complete Control

Gain total control by having the right information at your fingertips, with the ability to make immediate changes to add bespoke email rules and alerts customised to the risk profile of your business and industry. MailGuard empowers you with the knowledge and tools to manage your email security with confidence.

Multi-layered Protection

Adopt a Defence-In-Depth Approach to Your Email Security

Seamlessly stackable with any email security platform, including Microsoft 365 and Google Workspace, MailGuard offers a specialist layer of email security to protect your team from the advanced, zero-day targeted threats that are bypassing your defences.

Always On, Cloud-based Protection

No updates, patches or software installs

One of the greatest challenges for businesses that are trying to mitigate the threat posed by sophisticated cybercriminals is managing patches and keeping software up to date. As a cloud-based SaaS (Software-as-a-Service) solution, with MailGuard there is no software to install, which means zero patches or updates required to keep your team safe.

Congratulations, our analysts have identified MailGuard as an innovative technology leader.
